EXPERIENCE

Mern Intern WebEarl Technologies

📅 03/2026 - Present

- **BookBuzz:** Built a book exchange and marketplace platform using Node.js, Express.js, MongoDB, and Mongoose.
- **PropertyHub:** Developed a real estate listing platform with search, reviews, and shortlisting features using Node.js, Express.js, MongoDB.
- **Shoply:** Built a multi-tenant restaurant ordering and POS backend with menus, orders, payments, and reporting using Node.js, Express.js, Sequelize, and MySQL.

Node Js Intern CommunitiesHeritage Limited (CHL Group)

📅 05/2025 - 12/2025

- **CHPLFood:** Developed a scalable multi-tenant food ordering system backend with APIs for menu, orders, billing, payments, and reporting using Node.js, Express.js, Sequelize ORM and MySQL.
- **CHPL Vi:** Built APIs and reports for call tracking, logging, and analytics including call details, role-based access, and timezone handling for tenant- specific insights.

PROJECTS

StockPredictions Using ML

- Developed a **stock market prediction** web application using **Django** and **Python**, leveraging machine learning for price forecasting.
- Integrated historical stock data retrieval from **Yahoo Finance** for training machine learning models.
- Designed and implemented various machine learning algorithms with **scikit-learn** for accurate price predictions.
- Created visualizations of predicted stock trends using **Plotly** to facilitate data interpretation and analysis.

F1 Race Strategy Prediction & Analytics Platform

- Developed a full-stack F1 analytics platform using the **MERN stack** integrated with Python Machine Learning models.
- Built **ML models** to predict race strategies, pit stop timing, and driver performance outcomes.
- Integrated **Generative AI** to generate intelligent race insights and automated strategy suggestions.
- Designed and implemented **RESTful APIs** to connect backend ML models with the frontend dashboard.
- Created interactive dashboards using **React.js** and managed data using **MongoDB**.

Movie Recommendation System

- Developed an **AI-powered** movie recommendation system leveraging **machine learning** and **NLP (Natural Language Processing)** to suggest movies based on user mood, keywords, or actor preferences.
- Built a custom **emotion classifier** that analyzes text inputs and maps them to emotions such as happy, sad, curious, or excited.
- Linked detected moods to movie genres for personalized recommendations using a curated dataset and **Hugging Face** datasets API.
- Designed the backend with Flask REST APIs and implemented a modern **glass morphism**-based frontend using **HTML**, **CSS**, and **JavaScript** for an interactive user experience.

EDUCATION

Bachelor of Computer Science
and Technology
**LJ Institute of Engineering and
Technology, LJ University**

📅 2022 – 2026 | 🎓 CGPA: 7.98 / 10

SKILLS

- **Programming Languages**
Python, Java, JavaScript
- **Frontend & Backend**
HTML, CSS, React.js, Node.js, Express.js, Django, .NET
- **Databases & ORM**
SQL, NoSQL, Sequelize ORM
- **Tools, Cloud & AI**
Git, AWS, Postman, Power BI, Machine Learning, Generative AI, Data Science

ONLINE CERTIFICATE

- Back-End Development with .NET – Microsoft
- Building Generative AI-Powered Applications with Python – AWS
- AWS Cloud Technical Essentials – AWS
- Postman API Fundamentals Student Expert – Postman
- Exploratory Data Analysis for Machine Learning – IBM
- Machine Learning with Python – IBM
- HTML, CSS, and JavaScript for Web Developers – Johns Hopkins University
- Database Design and Basic SQL in PostgreSQL – University of Michigan
- Inheritance and Data Structures in Java – University of Pennsylvania
- Introduction to Java – LearnQuest
- Introduction to Psychology – Yale University

LANGUAGES

- **Gujarati** — Native Proficiency
- **English** — Professional Proficiency
- **Hindi** — Conversational Proficiency
- **Spanish** — Beginner
